

ProStencil Pricing

Our Pricing System Is Not All That We Want It To Be But It's The Best Alternative We Have For Now!!

We would prefer to have a shopping cart type system to make it easy for our clients – that's you! However, due to the amount of information we need, off-the-shelf shopping carts do not fit our needs. We are actively working on a solution but for now the following pricing systems will work.

Design Stencils -

For purposes of simplicity, we have chosen a system which uses price categories with each stencil assigned to a category based on size and complexity. This makes it easy to determine prices while browsing the stencil designs. The chart below has the prices of the various categories.

Prices for Individual Design Stencils are by level as indicated in the table below.

A	\$ 2.50	I	\$30.00
B	\$ 4.00	J	\$34.00
C	\$ 7.00	K	\$39.00
D	\$11.00	L	\$45.00
E	\$15.00	M	\$50.00
F	\$18.00	N	\$60.00
G	\$22.00	O	\$70.00
H	\$26.00		

For your convenience this table also appears on the Individual Design Stencil Order Form.

Note – Free Resizing up to 15% either height, width or both!

To make our pricing system as easy as possible for you to get the stencils that best meet the needs of your project, we will resize any stencil up to 15% in either height, width, or proportionately in both directions –at no additional charge. The price for size changes exceeding the 15% will be based on the new size but most likely will go up one price category. This does not apply if the stencil must be redesigned to fit your application. If you have questions about any such change, we will be glad to discuss your needs and alternatives with you.

Door Stencils –

Full Door Design Stencils

Pricing simplicity at its best. Full door stencils are most commonly used when doing a positive sandblasted design on the glass in a door because the entire door must be covered anyway. Full door design stencils are also commonly used in negative sandblasting if the design takes up most of the glass. Of course, some people just have a preference for using the full door stencil, regardless of the type blasting, because there is no need to use

registration lines, cut in border lines, etc. Positive sandblasting on doors can certainly be created using design components, versus the full door stencil, but the convenience and time saved in not having to cut border lines, etc. may be a factor in considering the difference in stencil cost of using components versus the full door stencil.

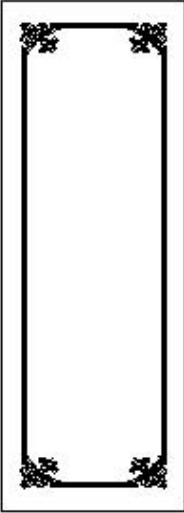

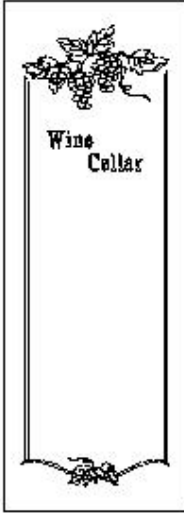

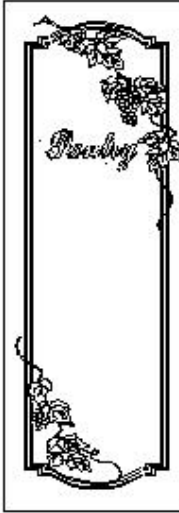

Full Door Stencil Pricing –any design – any stencil width up to 27 inc

Up to 48 inch length – (6’8” door with half glass) -	\$45.00
49 inch to 56 inch length – (6’8” door with three quarter glass) -	\$55.00
57 inch to 67 inch length – (6’8” door with full glass) -	\$70.00
68 inch to 82 inch length – (7’ to 8’ door with full glass) -	\$80.00

Door Component Stencils

Our Component Pricing is not up and working yet. We are working to create a system that will identify and price the design stencils in each door for you. This will make it easy to use. Temporarily, the samples below will give you an idea of the savings in component ordering. To make this interim simple for you, all you have to do is complete the order form and we will email back the component pricing before we cut the stencils.

Sample Door Stencil Component Pricing

				
SBDR67 \$16.00	SBDR127 \$28.00	SBDR02 \$35.00	SBDR10 \$32.00	SBDR47 \$51.00

Note: the above pricing does not include the price of any automotive masking tape used to create lines. It can be obtained locally or ordered on our Supplies Order Form.
